Bandwar 2036

A non-political development manifesto for the village

EDITION 2026-2036

BANDWAR · 25.5009°N, 86.1606°E

About This Document

DOCUMENT

This is the 2026–2036 edition of the Bandwar Vision Manifesto — a community-authored, non-political document outlining the village's development priorities for the next decade.

PUBLISHER

Bandwar Village Archive
Bandwar, Begusarai, Bihar — 851131
bandwar.archive@gmail.com

METHOD

Each priority was identified through consultation with village residents, review of public records, and observation of existing conditions. Completed projects are acknowledged by name and funding source.

SOURCES

— Census of India, 2011
— MGNREGA Public Portal
— Jal Jeevan Mission dashboard
— Prabhat Khabar, Hindustan, Dainik Jagran
— Rajya Sabha records
— Personal interviews with residents

Why This Document Exists

Every village deserves a plan. Not a plan written by outsiders, but a plan written by the people who live there — a record of what is needed, what has been done, and what could be.

Bandwar is a village on the banks of the Burhi Gandak river, in Begusarai district, Bihar — part of the historic Mithila region. It is home to over twelve thousand people. It has temples that are generations old, a school that once offered free education to students from across the region, and a community that has survived floods, famines, and the slow erosion of rural life.

This document is not a complaint. It is not a political statement. It is a record. It lists 15 priorities that villagers have identified — from a dedicated ghat on the riverbank to a functioning health facility — and it offers a path to each of them.

Some of these priorities will be addressed in the next two years. Others will take a decade. Some may not be addressed at all. But every one of them deserves to be written down, so that the next generation knows what their parents and grandparents wanted — and how far they got.

Chhath Ghat

● PRESENT • PRESENT • UNPAVED RIVERBANK — NO PERMANENT GHAT

◆ VISION • VISION • PROPER CHHATH GHAT WITH STEPS, RAILINGS, AND LIGHTING

THE REALITY

The village has no proper Chhath Ghat. Every year during Chhath Puja, hundreds of devotees — mostly women — stand on slippery, uneven riverbank steps of the Burhi Gandak to offer arghya to the setting and rising sun. There are no railings, no lighting, no changing rooms, and no safety arrangements. During the September 2025 flood, the riverbank eroded further, making access dangerous.

WHAT IT SHOULD BE

A concrete ghat with safe, non-slip steps leading to the water. Handrails on both sides, separate changing rooms for women, LED lighting for evening and 4 AM aarti, CCTV surveillance, waste disposal bins, and a soak pit for ritual materials. A dedicated drinking water tap and first-aid station for the festival period.

HOW IT CAN HAPPEN

SCHEME

Namami Gange + MGNREGA + State Tourism

AUTHORITY

NMCG, BUIDCO, Gram Panchayat, District Administration

COST

₹20-30 lakh

TIMELINE

12 months

Ram Janki Fuels (Petrol Pump)

● PRESENT · PRESENT · INDIANOIL PETROL PUMP – BASIC FACILITIES

◆ VISION · VISION · MODERNISED PUMP WITH COMPLETE CUSTOMER FACILITIES

THE REALITY

Ram Janki Fuels serves the village and passing highway traffic on SH 55, but its facilities are minimal. There is no air pressure machine, no clean restroom, and no drinking water for customers. During summer, customers wait in the open sun. The convenience store is small and poorly stocked. There is no EV charging infrastructure for the future.

WHAT IT SHOULD BE

A modern petrol pump with digital dispensers, a free air pressure machine, clean restrooms for men and women, an RO drinking water station, a small convenience store, an EV charging point, and a clean waiting area with benches. CCTV coverage across the forecourt and proper LED lighting under the canopy.

HOW IT CAN HAPPEN

SCHEME

IOCL Dealer Development + PACS Petrol Pump Scheme

AUTHORITY

Indian Oil Corporation + Dealer

COST

₹10-15 lakh

TIMELINE

6 months

Ram Mandir Thakurbari

● PRESENT · PRESENT · RAM MANDIR THAKURBARI — NEEDS RENOVATION

◆ VISION · VISION · RENOVATED TEMPLE WITH TWIN SHIKHARAS AND FULL FACILITIES

THE REALITY

The Ram Mandir Thakurbari is one of Bandwar's most distinctive temples, with its twin shikharas. But the temple needs renovation — the paint is faded, the courtyard is unpaved, and the facilities for devotees are minimal. During the annual Ram Katha, over a hundred villagers gather, but there is no proper seating, no sound system, and no clean toilets.

WHAT IT SHOULD BE

A fully renovated temple with fresh whitewashed twin shikharas, marble flooring, LED evening lighting, and a sound system for Ram Katha and bhajan. A seating area for 100+ devotees, shoe rack and hand wash at the entrance, drinking water station, clean toilets, a secure donation box, and CCTV surveillance. A pucca room for the priest and a fire extinguisher for safety.

HOW IT CAN HAPPEN

SCHEME

State Cultural Fund + MPLAD + Community Contribution

AUTHORITY

Art & Culture Department, MP Office, Temple Committee

COST

₹15-25 lakh

TIMELINE

10 months

Chhota Krishna Mandir

● PRESENT · PRESENT · CHHOTA KRISHNA MANDIR — NEEDS UPKEEP

◆ VISION · VISION · RENOVATED TEMPLE WITH FRESH ARCHES AND MARBLE

THE REALITY

The Chhota Krishna Mandir is the smaller of the village's two Krishna temples. Its distinctive scalloped arches and marble steps are its identity, but the paint has faded, the marble has worn out, and the shrine needs daily upkeep. During Janmashtami and Radha Ashtami, devotees visit in large numbers, but there are no proper facilities — no shoe rack, no hand wash, no seating.

WHAT IT SHOULD BE

A freshly painted temple with bright, restored arches and non-slip marble steps. Clean marble flooring inside the shrine, LED evening lighting, fresh flower decoration daily, and a shoe rack at the entrance. A hand wash station, drinking water tap, secure donation box, and a small tulsi garden as part of the temple's spiritual ambience.

HOW IT CAN HAPPEN

SCHEME

State Cultural Fund + MPLAD + Community Contribution

AUTHORITY

Art & Culture Department, Gram Panchayat, Temple Committee

COST

₹8-12 lakh

TIMELINE

8 months

Bada Krishna Mandir

● PRESENT · PRESENT · BADA KRISHNA MANDIR — NEEDS RENOVATION

THE REALITY

The Bada Krishna Mandir is the larger of the two Krishna temples. Its whitewashed exterior, arched entrance, and courtyard handpump make it a key gathering place. But the paint has faded, the courtyard is unpaved, and there are no facilities for visiting devotees. During Janmashtami and Radha Ashtami, crowding creates safety concerns.

WHAT IT SHOULD BE

A fully renovated temple with fresh white paint and blue trim, peacock feather motifs on the pillars (a symbol of Krishna), interlocking paver blocks in the forecourt, a green lawn on one side, and marigold flower pots. LED evening lighting, a sound system for bhajan, seating for 50+ devotees, and full facilities — shoe rack, hand wash, drinking water, and clean toilets. A secure donation box and CCTV surveillance.

HOW IT CAN HAPPEN

SCHEME	COST
State Cultural Fund + MPLAD + Community Contribution	₹15-20 lakh
AUTHORITY	TIMELINE
Art & Culture Department, MP Office, Temple Committee	10 months

Maharishi Gautam Aadi Shakti Durga Mandir

● PRESENT · PRESENT · MAHARISHI GAUTAM MANDIR — NEEDS RENOVATION

THE REALITY

The Maharishi Gautam Aadi Shakti Durga Mandir is the village's principal Durga temple, painted in distinctive orange with green pillars. But the structure needs significant renovation — the walls need fresh paint, the carved details need restoration, and the temple lacks proper facilities for the large crowds that gather during Chaitra Navratri and Durga Puja.

WHAT IT SHOULD BE

A fully renovated temple with five fresh white shikharas topped with gold kalash, intricate carved stone arches, and a green marble base cladding. Three decorated murtis inside the shrine. LED lighting for Chaitra Navratri, a sound system for bhajan and aarti, seating for 100+ devotees, and complete facilities — shoe rack, hand wash, drinking water, and clean toilets. CCTV surveillance and fire safety.

HOW IT CAN HAPPEN

SCHEME	COST
State Cultural Fund + MPLAD + PRASHAD Scheme	₹20-30 lakh
AUTHORITY	TIMELINE
Art & Culture Department, Ministry of Tourism, Temple Committee	12 months

Chandrashekhar Chowk

● PRESENT · PRESENT · CHANDRASHEKHAR CHOWK —
STATUE UNDER CANOPY

THE REALITY

Chandrashekhar Chowk honours the memory of Chandrashekhar Singh, Begusarai's first communist MLA. The statue stands under a red-tiled canopy, but the surrounding area lacks maintenance — the pavement is broken, there is no seating for elders, and the evening lighting is poor. The chowk deserves to be a dignified public space.

WHAT IT SHOULD BE

A properly maintained chowk with the statue under a fresh red-tile canopy, marble base, and steel railing. Evening LED lighting that illuminates the statue, a small garden around the pedestal, bench seating for elders, and non-slip paver block pavement. An information plaque explaining Chandrashekhar Singh's legacy, CCTV surveillance, and daily cleaning by the Panchayat.

HOW IT CAN HAPPEN

SCHEME	COST
MPLAD + 15th Finance Commission + Community Contribution	₹10-15 lakh
AUTHORITY	TIMELINE
MP Office, Gram Panchayat, Village Committee	6 months

Shaheed Ramchandra Dwar

● PRESENT · PRESENT · SHAHEED DWAR — VILLAGE
ENTRANCE GATE

THE REALITY

Shaheed Ramchandra Dwar is the main entrance gate to the village, built in memory of a village martyr. The blue arch with 'Jai Hind' and 'Bande Mataram' is a source of pride, but the paint has faded, the gold lettering has worn, and there is no proper lighting at night. Pedestrians and two-wheelers share the same narrow road, creating safety concerns.

WHAT IT SHOULD BE

A freshly painted gate in blue with gold lettering, topped with gold kalash finials. A tall flagpole with the Tiranga flying high, LED lighting on all four sides, and CCTV surveillance. The approach road is widened for two-way traffic, with a pedestrian footpath on both sides. An information plaque tells the story of Shaheed Ramchandra. A flower garden surrounds the base.

HOW IT CAN HAPPEN

SCHEME	COST
MPLAD + 15th Finance Commission + Community Contribution	₹8-12 lakh
AUTHORITY	TIMELINE
MP Office, Gram Panchayat, Village Committee	6 months

Historic Well (Chaupal)

● PRESENT · PRESENT · HISTORIC WELL — RECENTLY RENOVATED

◆ VISION · VISION · FULLY RESTORED WELL WITH HERITAGE SIGNAGE

THE REALITY

The historic well — the village's chaupal — has been given a fresh look with clean surfaces and modern lighting. But it still lacks proper drainage around it, seating for the elders who gather here every evening, and a heritage plaque that explains its significance to visitors.

WHAT IT SHOULD BE

A fully restored well with a heritage plaque describing its history, stone-paved surroundings, and seating benches for 15+ elders. LED evening lighting, an iron jaali cover on top for safety, and tulsi and flower pots around the base. A designated photo spot for visitors and daily cleaning by the Panchayat. CCTV coverage for security.

HOW IT CAN HAPPEN

SCHEME

Jal-Jeevan-Hariyali Abhiyan + MGNREGA + State Heritage Fund

AUTHORITY

PHED, Gram Panchayat, Art & Culture Department

COST

₹5-8 lakh

TIMELINE

4 months

Water Tower Coverage

● PRESENT • PRESENT • JAL JEEVAN MISSION WATER TOWER — PARTIAL COVERAGE

◆ VISION • VISION • COMPLETE PIPED WATER COVERAGE TO EVERY HOUSEHOLD

THE REALITY

The Jal Jeevan Mission water tower has been built near the village fields, but the pipeline network is incomplete. Many households still depend on wells and handpumps. Water quality is not regularly tested, and there is no toll-free helpline for repairs. The September 2025 diarrhea outbreak exposed how critical this gap is.

WHAT IT SHOULD BE

Complete pipeline coverage across the village with every household connected. Monthly water quality testing with public reports, chlorination at the tower, a toll-free repair helpline, and fair monthly meter reading. A grievance redressal counter at the Panchayat, backup power for the pump, and a water tanker for emergencies.

HOW IT CAN HAPPEN

SCHEME

Jal Jeevan Mission + Har Ghar Nal Ka Jal + 15th Finance Commission

AUTHORITY

Public Health Engineering Department (PHED), Gram Panchayat

COST

₹40-60 lakh

TIMELINE

18 months

Internal Roads

● PRESENT • PRESENT • KACCHI LANE — WATERLOGGING AND DUST

◆ VISION • VISION • PUCCA ROAD WITH DRAINAGE, FOOTPATH, AND LIGHTING

THE REALITY

The village's internal roads are unpaved. During the monsoon, waterlogging makes them impassable — children can't reach school, patients can't reach the main road, and farmers can't take their produce to market. During summer, dust affects the elderly and children. Several road projects have been sanctioned, but work is slow and some stretches remain incomplete.

WHAT IT SHOULD BE

A fully pucca road connecting every ward to the main SH 55, with covered drainage on both sides, LED streetlights every 30-40 metres, and a pedestrian footpath with kerb stones. Yellow centre line on main roads, speed breakers near schools and the chowk, and rainwater harvesting pits every 100 metres.

HOW IT CAN HAPPEN

SCHEME

PMGSY Phase-IV + MGNREGA + 15th Finance Commission + MPLAD

AUTHORITY

Rural Works Department, Gram Panchayat, District Administration

COST

₹15-20 lakh per km

TIMELINE

12 months

Rajkiyakrit Madhya Vidyalaya, Vandwar

● PRESENT • PRESENT • RAJKIYAKRIT MADHYA VIDYALAYA — NEEDS RENOVATION

◆ VISION • VISION • MODERN SCHOOL BUILDING WITH FULL FACILITIES

THE REALITY

The government middle school — established in 1955 — operates from a pucca building. But the boundary wall is broken, there is no electricity in some rooms, and there is no separate toilet for girls. The school lacks a computer lab, a library, and a proper playground. Mid-day meals are not provided. The school's infrastructure does not meet the standards of 2026.

WHAT IT SHOULD BE

A fully renovated pucca building with solar-powered classrooms, clean drinking water with RO, separate girls' and boys' toilets, a computer lab with 10+ computers, a library with 500+ books, and a playground with swings, slides, and a cricket pitch. A hygienic mid-day meal kitchen, a first-aid room with a resident nurse, a pucca boundary wall, and CCTV coverage.

HOW IT CAN HAPPEN

SCHEME

Samagra Shiksha Abhiyan + MPLAD + Khelo India + 15th Finance Commission

AUTHORITY

Education Department, BEPC, MP Office, Gram Panchayat

COST

₹60-80 lakh

TIMELINE

18 months

Gram Panchayat Bhawan

● **PRESENT** • PRESENT • GRAM PANCHAYAT BHAWAN – BASIC INFRASTRUCTURE

◆ **VISION** • VISION • MODERN PANCHAYAT BHAWAN WITH DIGITAL SERVICES

THE REALITY

The Gram Panchayat Bhawan functions, but lacks modern facilities. There is no proper meeting hall for Gram Sabha, no digital service counter, and land records are not digitised. Citizens must travel to Begusarai for basic certificates. The building also lacks drinking water, clean toilets, and disabled access.

WHAT IT SHOULD BE

An upgraded panchayat bhawan with a meeting hall for Gram Sabha (100+ capacity), a digital service counter (Common Service Centre), and digitised land records. Computers, printers, and internet access. Drinking water, clean toilets for men and women, and a ramp for disabled access. Permanent notice board, fireproof record room, and CCTV surveillance.

HOW IT CAN HAPPEN

SCHEME

Rashtriya Gram Swaraj Abhiyan (RGSA) + 15th Finance Commission + Digital India + MPLAD

AUTHORITY

Panchayati Raj Department, District Administration, MP Office

COST

₹20-30 lakh

TIMELINE

12 months

State Bank of India — Bandwar Branch

◆ VISION • VISION • MODERN SBI BRANCH WITH FULL CUSTOMER FACILITIES

THE REALITY

The SBI Bandwar branch is the village's only formal banking facility. It operates from a small building with limited counter space. During peak hours — especially on pension days and after harvest — long queues form outside. There is no proper seating for elderly customers, no dedicated counter for women, and no wheelchair access.

WHAT IT SHOULD BE

An upgraded SBI branch with two or more counters including one dedicated for women, seating for 20+ customers, and air conditioning. A locker facility, a passbook printing kiosk, and a wheelchair-accessible ramp. Drinking water, clean toilets, and a digital display for rates and notices. CCTV surveillance and biometric authentication counters.

HOW IT CAN HAPPEN

SCHEME	COST
SBI Rural Expansion Programme + MPLAD + State Level Bankers' Committee (SLBC)	₹15-20 lakh
AUTHORITY	TIMELINE
State Bank of India, Regional Office, MP Office	8 months

SBI ATM

● PRESENT • PRESENT • SBI ATM – SINGLE UNIT, FREQUENT CASH SHORTAGES

◆ VISION • VISION • MULTI-ATM FACILITY WITH CASH DEPOSIT KIOSK

THE REALITY

The village has only one ATM, which frequently runs out of cash. During festivals and harvest season, long queues form. There is no cash deposit facility, so villagers must visit the branch during working hours. The kiosk has no air conditioning, and security is a concern at night.

WHAT IT SHOULD BE

A multi-ATM facility with at least two machines, a cash deposit kiosk (CDM), and 24x7 operation. LED lighting inside and outside, CCTV surveillance from multiple angles, and air conditioning. An emergency call button, fraud alert signage, and wheelchair-accessible entry. Backup power via UPS and generator.

HOW IT CAN HAPPEN

SCHEME

SBI ATM Expansion Programme + Financial Inclusion + MPLAD

AUTHORITY

State Bank of India, District Administration, MP Office

COST

₹10-15 lakh

TIMELINE

6 months

Plus Two School Building

A new pucca building for Plus Two Vidyalaya Vandwar, extending education in the village beyond Class 10 for the first time. Inaugurated in March 2025.

FUNDING

₹1.96 crore

LED BY

MLA Kundan Kumar

COMPLETED

March 2025

Multiple Road Projects

Several road projects — from Gandak Bandh to Vandwar Musahri (₹60 lakh), Vandwar Krishna Mandir Chowk to Mohanpur, Parna PCC Road to Hanuman Mandir, and 8 more roads sanctioned across Begusarai.

FUNDING

₹11 crore+ (sanctioned)

PERIOD

2020–2025

INCLUDES

8+ road projects

Smart Gram Panchayat — PM-WANI WiFi

Begusarai became the first district in Bihar to equip all Gram Panchayats with public WiFi under PM-WANI. Bandwar was among them — bringing the village online.

SCHEME

PM-WANI / RGSA

LED BY

Giriraj Singh ji

COMPLETED

February 2024

Vaani Vilas Pustakalaya

A village library built with MPLAD funds under the initiative of Girija Singh — with books, a reading area, and portraits of national leaders on the walls.

FUNDING

₹25 lakh (MPLAD)

LED BY

Rakesh Sinha ji (MP)

INITIATIVE

Girija Singh

COMPLETED

September 2023

2026-2028

Foundations

Water, roads, drainage, and emergency infrastructure

Water security

Complete piped water coverage to every household under Jal Jeevan Mission.

Internal roads

Pucca roads connecting every ward to SH 55 with drainage and streetlights.

Drainage

Covered storm water drainage to prevent waterlogging during monsoon.

Banking access

Upgrade SBI branch and expand ATM facility with cash deposit kiosk.

Digital services

Extend PM-WANI WiFi and digitise Gram Panchayat services.

2029–2031

Institutions

Schools, healthcare, panchayat, and public services

School upgrades

Modernise Madhya Vidyalaya and S.N.K. High School with labs, libraries, and sports facilities.

Panchayat Bhawan

Build a proper civic building with Gram Sabha hall and digital service counter.

Health facility

Establish a dedicated primary health centre with ambulance service.

Power reliability

Solar panels on public buildings and streetlight upgrades.

2032-2035

Heritage & Culture

Ghats, temples, public spaces, and community identity

Temple restoration

Renovate Bandwar's temples and enhance facilities for devotees and festivals.

Chhath Ghat

Build a proper ghat on the Burhi Gandak for Chhath Puja and community rituals.

Public spaces

Develop parks, gardens, and seating areas at historic landmarks.

Cultural centre

A space for the village's arts, history, and community gatherings.

Heritage preservation

Document and preserve the village's historic sites, festivals, and traditions.

Adoption of this Manifesto

This document is a community statement. It is not binding on any authority, but it represents the considered view of the people of Bandwar about what their village needs in the decade ahead.

We, the residents of Bandwar, adopt this manifesto as a statement of priorities. We ask that any authority — local, district, or state — consider these priorities when planning investments in the region. We ask that our elected representatives raise these matters in the appropriate forums.
